

SMART MANUAL

Garden
Lights

Download the app

- Download the Smart Life app.
- Make sure the Wi-Fi router supports 2,4 GHz. You can check this in the router's settings.

Scan the QR-code to download the app.

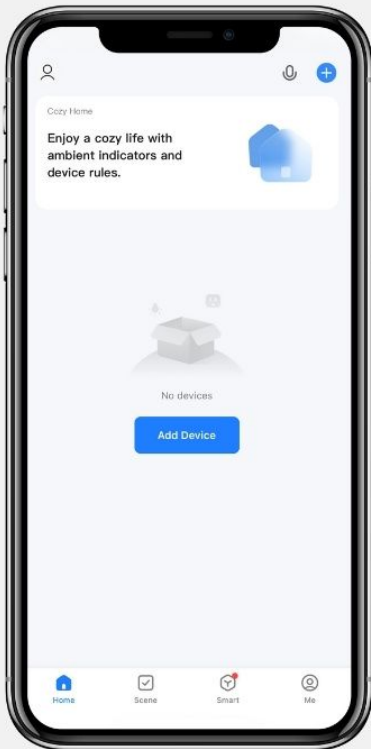

Creating an account

- Click on 'Sign Up'.
- Select a country and enter your e-mail address.
- Click on 'Get verification code'.
- Open your mailbox and enter the verification code.
- Set a password and click 'Continue'.
- Allow the Smart Life app to search for and connect to devices on your local network.
- The app may ask to connect to Bluetooth devices, if so, click 'Yes'.

Pairing a Gateway

- Click on the + sign at the top right of the app and then select 'Add Device'.
- From the left-hand column, 'Gateway Control' and from this category, select 'Multi-function Gateway (Zigbee)'.

- The app asks whether the Gateway is flashing. Confirm this if this is the case. If not, click 'Reset Device Step by Step'.
- Indicate whether the Gateway is blinking fast or slow.
- The app will now start connecting to the Gateway. This may take up to 2 minutes.

Pairing a Smart light source

- Click on the + sign at the top right of the app and then select 'Add Device'.
- From the left-hand column, select 'Lighting' and from this category, select 'Lighting (Zigbee)'.
- Select the correct Gateway to connect to.

- The app asks whether the light source is flashing. Confirm this if this is the case. If not, click 'Reset Device Step by Step'.
- The app will now start connecting to the light source. This may take up to 2 minutes.

Optional: Repeat the above steps to add another light source.

Pairing a Motion Sensor

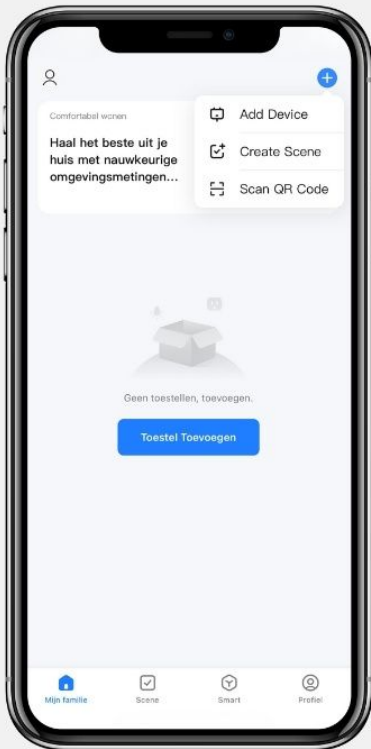

- Click on the + sign at the top right of the app and then select 'Add Device'.
- From the left-hand column, select 'Sensors' and from this category, select 'Motion Detector (Zigbee)'.
- Select the correct Gateway to connect to.

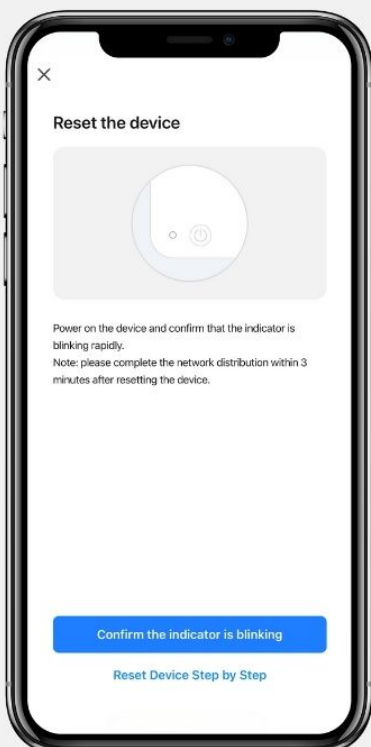

- The app asks whether the Motion Sensor is flashing. Confirm this if this is the case. If not, click 'Reset Device Step by Step'.
- The app will now start connecting to the light source. This may take up to 2 minutes.

Optional: Repeat the above steps to add another Motion Sensor.

Pairing a Switch

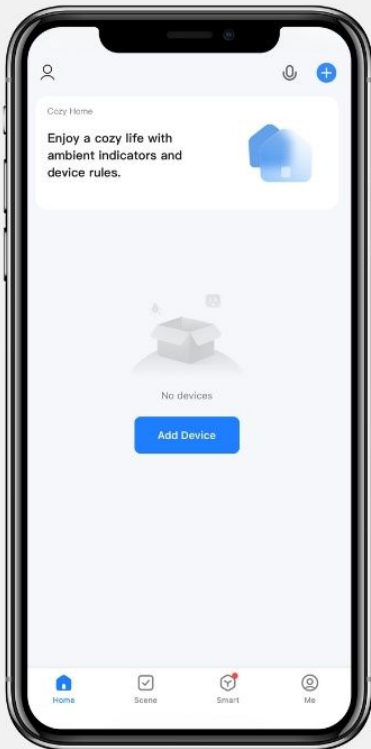

- Click on the + sign at the top right of the app and then select 'Add Device'.
- From the left-hand column, select 'Electrical' and from this category, select 'Switch (Wi-Fi)'.

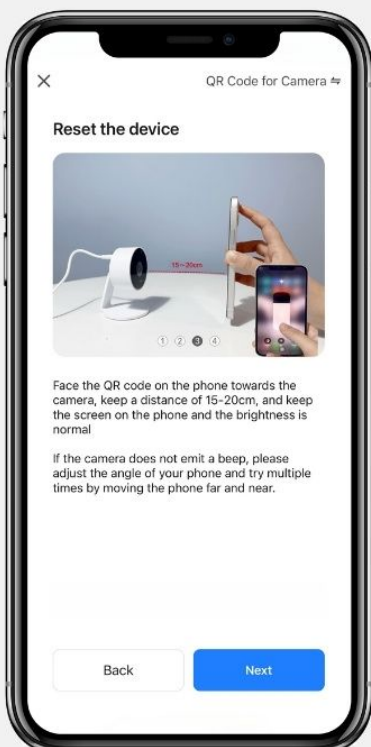

- The app asks whether the Switch is flashing. Confirm this if this is the case. If not, click 'Reset Device Step by Step'.
- Indicate whether the Switch is blinking fast or slow.
- The app will now start connecting to the Switch. This may take up to 2 minutes.

Optional: Repeat the above steps to add another Switch.

Pairing a Camera

- Click on the + sign at the top right of the app and then select 'Add Device'.
- From the left-hand column, select 'Camera & Lock' and from this category, select 'Smart Camera (Wi-Fi)'.

- Using the Smart Camera, scan the QR code.
- When the camera makes a sound or the light on the camera flashes, click 'Next'.
- The app will now start connecting to the Camera. This may take up to 2 minutes.

Optional: Repeat the above steps to add another Camera.

Resetting

Gateway (Wi-Fi / Zigbee)

Press and hold the reset button for 10 seconds using the pin provided. Then wait until the red light starts flashing rapidly (after about 30 seconds).

Light source (Zigbee)

Disconnect the light from the main cable for 2 seconds. Then reconnect the light to the main cable. Repeat this 3 times.

Motion Sensor (Zigbee)

Press and hold the reset button for 5 seconds.

Switch (Wi-Fi)

Press and hold the reset button for 5 seconds.

Camera (Wi-Fi)

Remove from the app (to disconnect), then press and hold the reset button for 5 seconds.
