

Using these steps, you'll easily install our 12-volt outdoor lighting:

- 1** Lay out the lights in the required locations and roll out the main cable.
- 2** Connect the F-connector to the main cable and place the light.
- 3** Connect the cable from the light to the F-connector.
- 4** Connect the M-connector at the beginning of the main cable.
- 5** Plug the M-connector into the transformer.
- 6** Insert the transformer plug into the socket.
